## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1-4 and 7 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Denk et al. (4,667,123)

Regarding claim 1, Denk et al. shows a permanent magnet rotor, comprising:

- A solid cylindrical permanent magnet (40);
- A power transmitting member (42, 44) connected to an axial end of said permanent magnet, and
- A reinforcement sleeve (170) into which said permanent magnet is press fitted (Figures 4 and 5).

Regarding claims 3 and 7, it is noted that Denk et al. also shows all of the limitations of the claimed invention.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Denk et al. in view of Dohogne (4,910,861).

Regarding claim 2, Denk et al. shows all of the limitations of the claimed invention except for the sleeve made of fiber reinforced plastic material.

Dohogne makes the sleeve of fiber reinforced plastic material for the purpose of reducing eddy current.

Since Denk et al. and Dohogne are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to make the sleeve of plastic as taught by Dohogne for the purpose discussed above.

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Denk et al. in view of Montagu (5,424,632).

Regarding claim 4, Denk et al. show all of the limitations of the claimed invention except for the length selected such that  $L/D$  is 0.14 or greater where L is the overlap length, and D is an outer diameter of said permanent magnet.

Montagu selects the length such that  $L/D$  is 0.14 or greater where L is the overlap length, and D is an outer diameter of said permanent magnet for the purpose of improving a better bandwidth.

Since Denk et al. and Montagu are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to select the appropriate length as taught by Montagu for the purpose discussed above.

***Allowable Subject Matter***

8. Claims 5 and 6 are allowed.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
